

LAND DEVELOPMENT PROJECTS

CITY OF GREEN FIRE STATION NO. 2

Hammontree & Associates completed the design engineering for the City of Green's Fire Station No. 2 along east Turkeyfoot Lake Road. The project included surveying, permitting, site grading, drainage design and on-site utilities design and permitting for a septic system and water well for the new facility.

RITE AID STORES

Hammontree & Associates completed the site design engineering for over 193 RITE AID stores throughout Ohio and Pennsylvania. Design work included site grading, parking lot layout, stormwater management, on-site and off-site utility design. H & A also assisted with Boundary and ALTA surveys, Phase I & II ESA's, local permitting, rezoning and variance assistance, easement preparation, platting and construction staking. With all of these services we provided "one stop consulting services", which proved to be an excellent fit for the fast paced development schedule of the Rite Aid development program.
